GuardRail Quick Start Guide

Get started in 5 minutes

This is a pilot program. GuardRail has no impact on your grades. Your feedback will help shape the product. All participation is voluntary.

Installation

1 Download the Extension

Click the bitly link provided by your professor to download the GuardRail extension zip file. Save it to your Downloads folder.

2 Unzip the File

Locate the downloaded zip file and extract it. You should now have a folder containing the GuardRail extension files.

3 Load Extension in Chrome

Open Chrome and go to `chrome://extensions`. Enable "Developer mode" (toggle in top-right corner). Click "Load unpacked" and select the **dist** folder inside the GuardRail folder you just extracted.

4 Create Account

Click the GuardRail icon in your browser toolbar and create an account.

5 Enter Classroom Code

Enter the classroom code **DNAY9R** to join the pilot program.

6 Verify Setup

Visit ChatGPT or Google Gemini. You should see a small GuardRail indicator in the top-right corner.

You're ready to go! GuardRail is now monitoring your AI tool usage to help you learn more effectively.

How It Works

GuardRail evaluates your prompts to AI tools based on learning intent:

Good prompt: *"Can you explain how async/await works in JavaScript? I'm getting errors in my fetch request."*

Needs improvement: *"Write my JavaScript homework"*

When GuardRail detects a shortcut-style prompt, it will suggest ways to make it more effective for learning while still getting help from AI.

Your First Prompt

Try asking an AI tool for help with your coursework. GuardRail will analyze your prompt and provide feedback if needed. The goal is to help you use AI as a learning tool, not a replacement for thinking.

Need Help?

Contact your professor or email **guardrail.feedback@proton.me** if you encounter any issues.
